

This site is all about FAQs - Frequently Asked Questions. As for most of the questions here, I'd say they're Fervently Asked Questions as they are questions you'd asked when you hit against the wall. I hope they're also Fast-Answered Questions for you! In case you haven't noticed, the FAQs here are on the Joomla CMS (Content Management System) and its extensions.

JoomlaFAQs follows the structure found in [joomla.org](http://joomla.org) . The extensions are placed in major categories, which contains sub-categories and extensions. You can see these categories on the left sidebar under the heading "JoomlaFAQs Categories". Click on the category or sub-category to see the list of JoomlaFAQs. Hover the mouse pointer on the category to 'slide open' the sub-categories. You can also refer to the JoomlaFAQs Sitemap.

Once you're in the sub-categories, you may see further sub-sub-categories under the various extensions. Click on the extension you're looking for and you will see a list of FAQs on the extension. If it's empty, that means there's no FAQs posted yet. If there is a list of FAQs, click on the FAQ you're looking for to open the item.

You can vote for the JoomlaFAQ by clicking on the Thumbs-Up or Thumbs-Down icon. You can also put it in your Favorites List. For this feature, you need to register with JoomlaFAQs.
